Actual Result: Invalid Username.

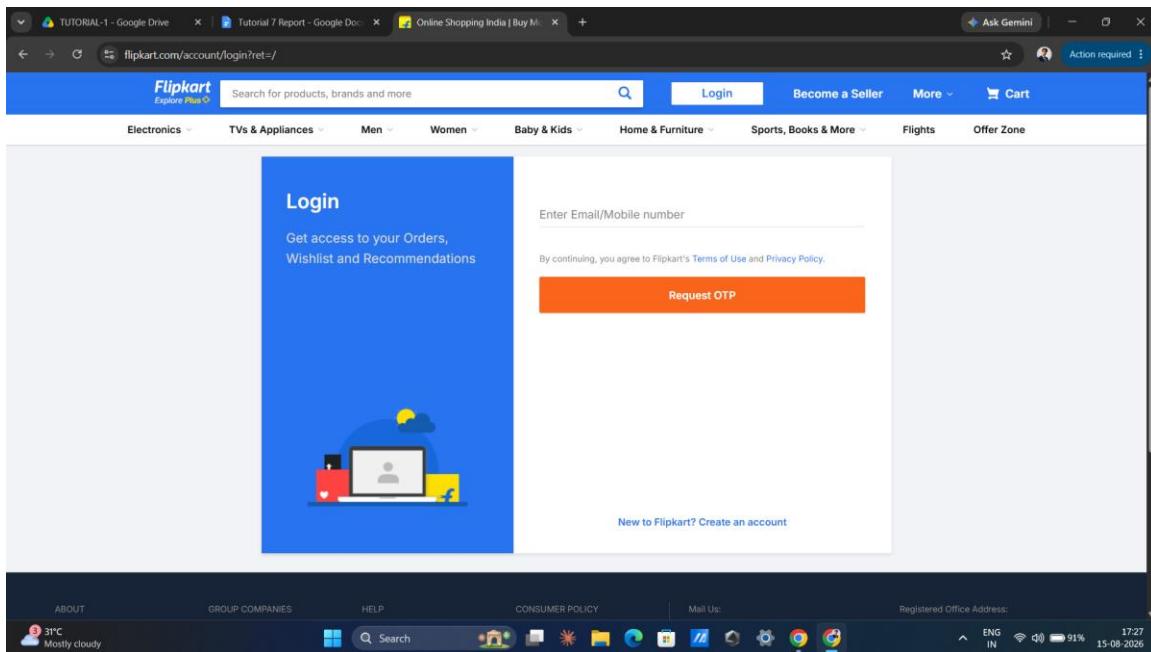

Status: PASS

Technique: BVA, Maximum + 1

Test Steps:

13. Open Flipkart login page.
14. Enter a 16-character username.
15. Submit the login form.
16. Verify the validation message.

SCREENSHOT / OUTPUT

Observation

- Values below 5 characters are treated as invalid.
- The minimum boundary value of 5 characters is valid.
- The maximum boundary value of 15 characters is valid.
- Values above 15 characters are treated as invalid.

Conclusion

The Flipkart username validation scenario was tested successfully using Equivalence Partitioning and Boundary Value Analysis. All four selected boundary scenarios passed as expected.
